Subject: Whites Point Quarry and Marine Terminal project - Paul Buxton request for a meeting with DFO re Environmental Monitoring for Blasting Plan

Mark:

I received a phone call from Paul Buxton, Project Manager of the Whites Point Quarry and Marine Terminal project, on May 18, 2006. Mr. Buxton inquired about the possibility of meeting with DFO in the near future to discuss the details of an environmental monitoring program that will be required if the project is given approval to proceed and the company's blasting plan is implemented.

At your request, I informed Mr. Buxton that DFO's position, at the present interval in the CEAA environmental assessment (EA) review process, is that it would be inappropriate to meet regarding this issue. DFO will be available to meet to discuss these details once this EA process is complete. DFO is currently reviewing the Environmental Impact Statement that has been submitted for this project.

Mr. Buxton indicated that he would be calling you to discuss DFO's position on this request.
