DFO has not confirmed that they have a HADD trigger for the quarry, but are leaning that way, based on advice from their area habitat coordinator. Based on that, it looks like they will scope in the quarry, too (at least, that's what they've said in a letter to the proponent). We know for sure that provincial EA applies.

Not sure if that clears it up. Call if need be. 902 426 9458

Derek

Hi Derek,

Steve has a comment concerning the 2nd bullet in Summary/Key Points: He's asking: I though there was a question as to whether the quarry would require a Fed. EA?

Please advise ASAP.

Thanks
