Just so we're all on the same page... I responded for CWS on the initial project description, so it makes sense that I follow this project through.

Subject: Belleoram Rock Quarry Draft Scoping Document

Good Afternoon All,

I was notified last week that ACOA will be participating within the comprehensive study process for the proposed rock quarry and marine terminal in Belleoram because they may potentially provide funding to the proponent to enable the project. ACOA's scope will include all project components associated with the construction, operation, modification, decommissioning, and/or abandonment of the proposed 900-hectare quarry and marine terminal. All aspects of the project (i.e. clearing, blasting, road construction, building construction, wharf construction, equipment set-up, water intakes, settling pond development, bridge installation, barasway infilling, etc...) will be covered within a single CSR and the three RAs (DFO, TC, and ACOA) will have signing authority respective to their scopes. For example, TC's scope is still only related to the marine terminal but this project component will be covered within the larger CSR. PWGSC will be involved in the EA process on ACOA's behalf. Also, TC will remain as lead RA for the project but will rely on PWGSC to provide assistance on project components related to ACOA's scope.

Therefore, if not already done so, please provide comments on the draft scoping document which includes ACOA as an RA which was emailed out on August 7, 2006. Attached for your convenience is the draft scoping document so that you do not have to search for the initial email. This document is very similar to the draft scoping document with only DFO and TC as RAs so please provide comments on the attached version as soon as possible.
