

***Goldboro and Area
Marine Protective Society***

RR #1,
Isaac's Harbour,
Nova Scotia
B0H 1S0

The Honourable Stephane Dion
Minister
Environment Canada
10 Wellington St., 28th Floor
Hull, Quebec

October 18, 2004

Dear Minister Dion:

Over 90% of residents contacted in Coddles Harbour, Country Harbour, Drum Head, Goldboro, Isaacs Harbour, Seal Harbour and Stormont are requesting a joint review panel environmental study of the proposed Keltic Petrochemicals LNG and petrochemical plant for this area. Attached, please find a petition signed by local area residents supporting this position.

Residents are very concerned with the lack of details surrounding this project and the total absence of an objective debate over its impacts on the community. There have been no discussions to date regarding the environmental and socio-economic affects of this project on the local area and the cumulative affects expected because of its close proximity to the Sable Gas Plant.

We believe that only a full joint review panel environmental study and scientific facts can provide the transparency and depth required to satisfy concerned citizens given the enormous scope of this 4.3 billion dollar project.

If you require any further information regarding our request, please do not hesitate to give us a call at (902) 387-2956. We look forward to your written response.

Sincerely,

Karen Skodje-Samoila
Representative,
Goldboro and Area Marine Protective Society

cc Mr. Roger Cousner, MP

Industrial Re-zoning of Goldboro Petition

Oct. 2004

I do not support the proposed industrial re-zoning of the Goldboro waterfront at this time. I am aware that a petrochemical plant is scheduled for this area. Before re-zoning should even be considered, a full Joint Review Panel Environmental Assessment must be completed by the Provincial and Federal governments and made public. Our environment, safety and way of life must be taken into account.

Oct. 2004

I do not support the proposed industrial re-zoning of the Goldboro waterfront at this time. I am aware that a petrochemical plant is scheduled for this area. Before re-zoning should even be considered, a full Joint Review Panel Environmental Assessment must be completed by the Provincial and Federal governments and made public. Our environment, safety and way of life must be taken into account.
