Subject: RE: Whites point Quarry and Marine Terminal project proposed blasting protocol

Phil

I will attempt to take a look at it.

Subject: Whites point Quarry and Marine Terminal project proposed blasting protocol

Hi, Norm:

We have received a 4 page blasting protocol from the Proponent of this project. I would appreciate it if you would take a look at it (I will have to send it by fax or deliver it to you since I have no electronic copy).

As you may know, this project is undergoing a Panel Review level of environmental assessment

The proponent is interested in using an adaptive management approach to mitigating potential adverse effects to fish, including marine mammals. You gave us excellent comment for the project description early on in the process and it would be appreciate your comments to confirm that the proposed blasting protocol is appropriate. If there are changes to the monitoring that you would propose please let us know.

Please call if you have any questions.

Thank you, Phil
