Phil,

Thanks for the information. It's really helpful because we are getting questions from the Minister's Office on a regular basis and need to be up to speed on this file.

Neil Walsh in the correspondence unit said there is no letter template so he recommended that you write a draft response with the details and he can edit and put it in the proper format.

Also, please see attached the most recent briefing note on Digby Quarry.

MEMORANDUM
MINISTER Digby Quar

Subject: White Point Quarry and Marine Terminal

Hi, Bruce. I am attaching a draft of the items discussed during Monday's meeting with CEAA and the other RA's. Jim Ross is off on sick leave at least until Friday and Paul is away. Reg is acting for Paul so I discussed the meeting notes with him. It appears that this project is taking the exact same track as the Deep Panuke project did, at least at the beginning.

I'm not sure if you know but Thomas Wheaton will be the AHC contact and will be making the HADD determination for the project.

I have a Ministerial Inquiry to respond to. Do you have a template that I could use? Also, the latest briefing notes would be helpful to me since I've just recently received the lead for the file. I will bring you up to date on what's happened since the last brief.

Thank you, Bruce
