Subject: RE: Digby Quarry Public Notice in Chronicle Herald

As we discussed the ad was as a result of advertising under the NWPA, it is strictly for the docking facility. We were not made aware of the commitment of the Minister and therefore followed the processes as prescribed under the NWPA. We are working with Habitat in so far as the Environmental Assessment under CEAA is concerned. I expect we will receive complaints as a result of the ad. It may be a good idea that should we receive complaints that you, Habitat and myself meet to discuss the issues and anticipated responses so that you can relay them to the Ministers staff.

Subject: Digby Quarry Public Notice in Chronicle Herald

Just a heads up to all that today a public notice in the Chronicle Herald appeared to notify the public that Global Quarry Products has made application to the Minister of Fisheries and Oceans to approve plans for a marine terminal. The Ministers constituency staff had made a commitment to the residents that they would be advised on any developments on this file to the extent possible. The Ministers staff nor I was not aware that the notification was being published.

Given that this file is extremely important to the Minister we must insure that good communication is maintained by all parties.

The Minister may invoke an inquiry into this matter.

Tim Surette
