**To:** 'Mark G McLean'  
**Subject:** RE: White Point Quarry and marine terminal

Hi, Mark. I'm sorry, we did send out the letter about 2 hours before we got your comments. Your comments were great and the good news is that we had made a couple changes that you had suggested already. I feel we will be able to accomodate most of your other requests in a follow up letter or as the process evolves. Let me know if you think an amendment letter is necessary. Things are going well otherwise though. Paul Buxton was, understandably, very upset at our position on the plasting plan, especially with the nieghboring Tiverton operation going on. However, we had no choice in the matter.

I trust everything is all set for Heather and your daughter. We are all waiting as well back here at HMD. In God's speed and shining Hope

Phil,

Just to let you know I have a few comments on the letter (nothing major) but I'm waiting to hear back from Chris and Cheryl to see if they have anything to add. Hopefully I'll have something for you by the end of today or sometime tomorrow. Thanks.

Mark

ps This is being sent from Toronto. We made it up OK and have settled into our new place. We also ran into Anita at the airport on Sat. Say hi to the rest of the gang there and we'll keep you updated as things progress.

Hi, Mark. Chris asked if we could send this letter over for him to see if everything is OK in terms of the province's interests. I am sending it through you, knowing you have the file. Feel free to comment on any part of the letter. Jim Ross has already had a first crack. I save it in WP format, hope it works.

All the best in TO!
