- apparently there was a call from Robert Thibault to David Anderson about Whites Point Quarry
- Citizens Coalition has hired Western Valley Development Authority to do an economic study of the proposed quarry
- WVDA contact is Janet Larkman - she may call
- also note that the coalition has acquired a portion of the proposed site (directly from the NJ owners) and plans to construct a museum or some facility, thereby preventing a quarry within 800 m radius (about 200 Ha)

0900 - LMF Paul Buxton re: status of draft PD

REDACTED

1330 - Helen MacPhail re: White's Pt. - she has a briefing note which indicates:

- approval issued for sewage holding tank on citizens' site
- citizens' have applied for a bldg permit
- no bldg permit issued, and DTPW has recommended against issuance
- policy is not to revoke an existing approval (for the 3.9 Ha site)
- if a residence is constructed, safety concerns would have to be considered

1430 - Helen again - their Minister wants Helen to call Buxton and recommend a press release to counter the PR campaign mounted by local opposition. I advised CEAA has no problems as long as the information is factual. I suggested it would be good to see a copy before publication to ensure accuracy wrt CEAA process.

 - he has spoken to Michael Cox of the CMM (Bear River), as well as Sherry Pictou of Acadia Band
 - he is not aware of any issues
 - I advised of possibility of native fishing issues in the area

REDACTED

Fri, Feb 21

REDACTED

- 0930 - called Michael Cox re: whites Point:
- a knowledge study is underway
 - terrestrial focus, but possibly some marine issues
 - no timeline - typically takes a few months
 - usually consists of three components:
 - historical review (church records, etc.)
 - species survey (plants of traditional use or value)
 - going into communities to do interviews (expect 50 or so interviews for this study)
 - some archaeology work was done, but it was not accepted by NS Museum

journal_2003.txt

- Bear River Band is paying for work - they did not want proponent to pay - Michael is not sure why
- bigger concern is local coalition group - proponent needs to initiate dialogue
- suspects that proponent has rubbed Chief Sherry Pictou the wrong way - seems to be some animosity

0930 - Ashraf Mahtab [REDACTED] - asked for copy of project description - I agreed to send

- retired mining geologist, opposed to quarry. His concerns include:

- well water draw-down
- pit water discharge (metals, SS)
- no royalties to NS
- can't do this in NJ because of regulations preventing
- socio-economic impacts
- locals will not get jobs
- ballast water from NJ
- fisheries

- Mahtab confirms they (Concerned Citizens) have applied for building permit (14' x 16' cottage). Still waiting to hear from municipality.

- talked to Mike Freeman [REDACTED] and Don McMahon [REDACTED] at TC, as well as Rod Fraser [REDACTED] at NSDNR re: waterlot leases. As far as Don and Rod know (and it's their business to know), unless submerged lands are specifically administered by a federal entity such as SCH or TC, they are provincially held. Rod says this definitely applies out to 3 mile mark, and possibly further.

- e-mailed above info to Phil Z.

- more organizing for meeting

REDACTED

REDACTED

- called Phil Z. to advise that risk of "lurking" land trigger appears extremely low and he should proceed with FCR
- sent out e-mail notification of Whites Point meeting (Monday at 10)

REDACTED

1500 - e-mail Buxton re: Waterlot and Mahtab request for PD

REDACTED

Thu, Mar 27

REDACTED

- spoke to Paul Buxton re: waterlot question and FCR, also about release of PD. Paul will be making the PD available to the Community Liaison Committee at the April 9 meeting. I called Mr. Mahtab and explained that, in light of the proponent's plans, I would not send him the PD after all - he wasn't too happy about it, but I stressed that the document is considered to belong to the proponent and should be obtained from there, or via the Public Registry once a federal EA commences. It's more a question of protocol than anything else - it's not CEAA's responsibility or role to provide access to EA records - there are more appropriate channels. Also don't want to set a precedent. I promised to call him when EA commences.

1030 - Phil re: DFO "letter of advice" for 3.99 Ha quarry - it's a condition of provincial approval. If DFO issued this letter, activity would likely proceed at the small quarry. Does this contravene CEEA (s.5(1)(d)) by allowing the project to proceed "in part"? Discussed with Bill - how much rock will be quarried? what will it be used for? May be able to use this "test" site to gather data to address issues with the full site (e.g. underwater noise). Bill advises the DFO tread with caution, and should seek legal advice

- call from Thomas wheaton re: does Digby Quarry #2 have to be considered for cumulative effects? I advised that the rule of thumb is that a project must be beyond the discussion stage (e.g. in a regulatory process, or a written submission or correspondence exists indicating the intent to proceed.)

- called Steve Chapman re: Whites Pt. Jean Crépeault is now on the file because Steve is too busy with REDACTED. They had to extend the deadline on the draft agreement and TOR because of a mistake in the mailing address for comments. New D/L was yesterday. Approx 50 submissions were received, all more-or-less the same.
