**Subject:** FW: draft MC - White's Point Quarry  
**Importance:** High

Good afternoon

Please find attached the Draft MC as prepared by DFO on the White Point's Quarry. This is the first draft we have seen. As you are aware the Joint Review Panel recommended not allow the project to proceed. The draft MC is the Federal response to this decision. In general

- The Province of NS supports the EA decision to reject the project
- The Government of Canada is prepared to support the EA decision to reject the project
- TC responses were drafted with input from Marine Safety recommendation no. 7 of the EA as it relates to Ballast Water Regulations (**Draft 1 Annex**).
- TC has been asked not to issue an NWPA permit.

We have made some minor editorial suggestions, however, are generally satisfied with the content. I would appreciate it if, Mihai could take a quick look, particular lily at the Annex and verify that you are satisfied with the wording.

Thanks
