Okay - I will leave in your capable hands to figure out what message should go to the province. Nancy is just looking for some reassurance that we will have a similar message, so it would be helpful for Ginny to speak to her.

We're both here in Vancouver along with Stuart Dean who is leading on the MC.

I just got a message from Mark that he would try to speak to you about this. Are you two at the same meetings in BC?

Her number is 902-424-6632 or cell 902-476-5014.

Mike: do you have her phone #? I will call her.

Also give me a call at 613-222-8352 and we can discuss.

I spoke to Nancy Vanstone today at a meeting. She is the acting DM for NS Environment. They will be announcing shortly, probably early next week, and they are concerned about our timing and our decision. They would like a sense of what we will be saying, with the hope that our message will be that we accept the general finding of the panel (ie reject the quarry), but that we have some issues with the panel going beyond its scope. She would like to either have me get back to her on where we are on timing and substance, or be able to speak to someone to get an understanding.

Any suggestions?

Mike

Hi Carl,

Habitat in HQ is saying that they have heard that the province will be announcing their decision sometime this week. We should be following shortly after- I am hearing early December.

Thanks,  
Katie
