Ginny,  
I was not aware that we had issues with the Panel going beyond its scope. Where did this idea come from?  
Stuart

I spoke to Nancy Vanstone today at a meeting. She is the acting DM for NS Environment. They will be announcing shortly, probably early next week, and they are concerned about our timing and our decision. They would like a sense of what we will be saying, with the hope that our message will be that we accept the general finding of the panel (ie reject the quarry), but that we have some issues with the panel going beyond its scope. She would like to either have me get back to her on where we are on timing and substance, or be able to speak to someone to get an understanding.

Any suggestions?

Mike
