		Phone	426-6947

Call Received  Call Made  Meeting  Other Call returned to dept.

Jerry had asked the proponent name I told him Nova Stone and the contact is Paul Buxton -- gave #. Jerry had said that they did contact Brian Jallymore in halibut but the application was sent back because it was too vague. Jerry was pleased to hear from the dept because the only information he has received on the topic was Ed Bond and it is nice to get actual constructed information. Jerry had noted that there is an issue with the halibut re Right Whales, Males, hump backs, belugas, fisher etc.

- Nova Stone will have to apply with the proposal with them
- Jerry had noted that his dept is mandated to look after Right Whales.
- The application DFO received by Brian Jallymore was regarding a wharf.
- Shortly (not complete) a species @ risk Act should be passed which may affect proponent... incidental harm

Jerry was curious when they wanted to start operations - ASAP.

Told Jerry that I am contacted every couple days to see if the application is approved.

Told Jerry that the application does not require an Environmental Assessment by an Regs. ~~in~~ <sup>or</sup> < 10 Acres -

→ Jerry asked how many years do they plan to ~~run~~ <sup>or</sup> quarry.

→ Told Jerry in the application 30 years, Blast once a month.

→ ~~Commented~~ <sup>or</sup> Commented that the program claims that they want the Open ASP to do Serial work before Leases are in place.

→ Jerry had said that he does not really see any problem with use granted in approval because Nova Stone will still have to apply to DFO because of Blast + shore work.

Thanks Jerry for his time -- Jerry said he will keep in contact re: this matter.
