Subject: Revised FCR summary for WP

I revised the table and added a note at the bottom. I'm not sure if the wording is exactly right, but I think it more-or-less captures the essence of what we discussed.

FCR_summary.rtf

Federal Coordination Request Whites Point Quarry and Marine Terminal

Organization	Record of Determination	Trigger
DFO Habitat	Likely to require an EA (for the marine terminal)	Law List (Fisheries Act s.35(2))
DFO Navigable Waters	Likely to require an EA (for the marine terminal)	Law List (NWP Act s.5(1))
Environment Canada	Not likely to require an EA. In possession of specialist or expert information or knowledge.	
Natural Resources Canada	Not likely to require an EA. In possession of specialist or expert information or knowledge.	
Indian and Northern Affairs Canada	Not likely to require an EA	
Industry Canada	Not likely to require an EA.	
Transport Canada	Not likely to require an EA	

Note: The above table reflects the outcome of the Federal Coordination process. Subsequent to that, DFO determined that it had a Fisheries Act s.32 trigger in relation to the blasting plan for a provincially-approved 3.9 Ha quarry contained within the proposed 380 acre main quarry site. Since 3.9 Ha quarry will ultimately be part of the larger main quarry, DFO determined that therefore it likely also has a Fisheries Act s.32 trigger for the main quarry.
