

Meeting: Johnny + Dave + Dec 20/02
Allan on Miller Lake
facility

Nova Stone Meeting Jan 6/03

Helen MacLellan

Benny Jeffrey - Introductions

Louise Kangille

Phil Zornara - Global Quarry Product → through
Nova Stone

Jim Ross

Paul Buxton - Global Quarry Products - 3700000

Danie Kern

Derek Macdonald - Quarry would not have been seen

Bill Coulter from highway 27.

Chris Daly - Purchased a number of studies
underway & completed

- Clayton - looking to find

- concrete maker in NJ

(Big company)

- operate sand pits in NJ

- looking for permanent source
of stone. (need 2 million tons/yr)

- Can't see cost affecting decision for long term
project

- loading rate is not clear → load silley
in 8-10 hours

- capacity of 45,000 tonnes for ships
into NJ

- 625 F ship (excess of 60,000 tonnes)
capacity

* Climate change on project

- Stone to be washed on-site
- quadrant type loader → for minimized bottom disturbance
- trying to develop loader ~~that~~ that does not have to move ship
- similar to the one in Sydney
- not anticipating dredging → will drive piles into bare rock
- rock will be sized for concrete or ash fault
- fines will be used in block plant

Jim Ross

- Comp study is more than a core likely
- Capacity of wharf will be bigger
- Bill Coulter - project splitting may be a concern
- Comp study
 - quarry > 1 million tonnes/yr
 - 1000 tmt >
- Bill also talked about possibility of a panel → likely significant effects
- public concerns
- need project description before federal department's candidate

Paul Burton - concerned that scope of assessment is not too broad!

* - will forward queries on
