Subject: RE: Timing of News Release

That's good news. I will let Bruce Young, the current project manager know.

John,

Greetings. How is the approval coming for the news release? At the moment, our version of the joint release has been approved in-house and has moved up to the Minister's Director of Communications. We have proposed Wednesday at the possible day of release. We have almost completed approval of the ad copy. Once approved, I will send you the French and English versions for your posting to local papers.
