Yes, both Habitat -F.A. ss.35(2) and Navigable Waters - NWPA ss. 5 (1) have triggered CEAA. My letter to Global only mentions the NWP trigger because it was the one initiated first. There may be another F.A. trigger - s. 32 - if the blasting is likely to kill fish. Section 35 prohibits any harmful alteration, disruption or destruction of fish habitat unless a authorization from our Minister is issued ( the issueing of the authorization is actually the trigger here.) Section 32 prohibits the killing of fish by means other than fishing. An authorization must be issued here as well if fish are likely to be killed by blasting or any other physical activity associated with the project. We will need more information to determine this.

Glad to hear the good news about Mark & family

Thanks Phil - Is it both habitat and nv. waters?

We hope to have the MOU ready to circulate in the next couple days.

Yes, please email me all correspondence as well. That will make it easier for the time I am dealing with this exclusively.

thanks

Yes, Cheryl, we got our last response from FCR requests last Tuesday. DFO will be the only RA. EC and NRCan have offered to give expert advice for the project.

I have been e-mailing Mark on developments up till now. Should I continue that and perhaps cc you? or should I contact you directly? I imagine Mark will be fairly busy once the baby arrives. Any news?

Hi Phil - Has the FCR process finished? What were the results?

Thanks  
Cheryl
