Contacted Ross and Winchester. No official response from DFO at this time. He will call you when he has a chance to review information that he received today.

Bob, can you contact DFO today & ask them the same question we asked for Nova Stone i.e. are there any particular concerns they would like to see addressed in our approval re blasting?

I am told the file was referred to Peter Winchester but you may also wish to touch base with Jim Ross (426-6111). Advise them that we need a response asap.

Let me know how you make out. Thanks.
